SteadyPRO

Turning Made Easy

The Robert Sorby **SteadyPRO** is a very easy to use jig that gives additional tool support when bowl turning, hollowing and spindle work.

The versatile **SteadyPRO** fits a wide range woodturning lathes by utilising the stems from the Robert Sorby modular tool rest system.

The easy to adjust cantilever and smooth action rollers, ensure optimum control for a large selection of tools.

The **SteadyPRO** system can be used with recommended Robert Sorby woodturning tools and many other brands.

Features & Benefits

Cantilever roller positioning for optimum tool support

Smooth action rollers

Heavy duty construction

Stem location

Quick and easy adjustment

WARNING

This product must be used with care and appropriate PPE worn during use.

Step-by-Step Guide

STEP 1

Turn the **SteadyPRO** over to access the stem fitting location

STEP 2

Screw the stem into the base of the **SteadyPRO** and lock into position

The Robert Sorby SteadyPRO

STEP 3

Insert the stem into the lathe banjo

STEP 4

Place the desired tool onto the lower roller and adjust the height of the stem in the banjo, so that the cutting edge of the tool is at the required position and lock the stem into place

Step-by-Step Guide

STEP 5

Slacken the cantilever locking screws and adjust the upper roller until it sits securely on the top of the tool shaft and lock into position

STEP 6

The rollers allow the tool to move smoothly, whilst being held securely

SteadyPRO - Top Tips

- Always ensure that all bolts and locking handles are locked into position before starting to use the SteadyPRO
- Ensure the upper roller is sitting securely on the top of the tool without hindering the correct operation
- Maintain tool shaft contact with both rollers at all times during use
